## OBJECTIVE

---

An Engineer with 6 years of experience designing and maintaining resilient, highly available systems, automating deployments through CI / CD pipelines, managing cloud infrastructure. Looking for a full-time Senior DevOps, Site Reliability, or Architect role.

## EXPERIENCE

---

### Platform Engineer II

WeTransfer B.V.

Nov 2022 - Present

*Amsterdam, Netherlands*

- **Maintained, upgraded, and customized** several aspects of 7 kubernetes clusters, across 3 regions comprising a mix of EKS and AWS EC2 clusters.
- As an Eventing SME, led the migration of a 1.7 million messages/hour eventing setup from kops to EKS, achieving **zero downtime and zero message loss**.
- Streamlined and re-engineered the eventing system by replacing the complex AWS component-based system and custom kubernetes operator with a simplified Terraform-based solution, leading to a **30% improvement in end-to-end latency, significantly reducing system complexity and better DevEx. via SDKs**.
- **Boosted developer efficiency** through enhancements to our internal developer tool. Supported custom AMI creation, ephemeral deployments, deployment tracking, TF/K8s code scaffolding, all while adhering to the "You build it, you deploy it" principle.
- Managed an org. wide **migration from TravisCI to Github Actions**.
- **Hosted several Kubernetes and Terraform workshops** for software engineers and knowledge-sharing sessions on our infrastructure. **Increased the average code quality and our knowledge base**.

### Application Development Analyst

Accenture Solutions Pvt. Ltd.

Sep 2021 - Nov 2022

*Noida, India*

- **Integrated the deployment, testing and security checks under one CI/CD pipeline**, resulting in efficient deployments and resource optimization. The success of this project was replicated in different client projects and proposals.
- **Migrated an on-premise Kubernetes cluster to the cloud** on AWS EKS and automated release pipelines, saving manual efforts of 1-2 hours per release.
- **Got AWS Solutions Architect Certified**, already holding AWS Cloud Practitioner certification and Certified Kubernetes Application Developer (CKAD)

### DevOps Associate

Provana Pvt. Ltd.

Aug 2019 - Sep 2021

*Noida, India*

- **Designed the first automation framework for the company**. Automated deployment of IConnect247, saving manual release efforts from 2 days to 3 hours.
- **Automated the daily monitoring of IConnect247** via Powershell, Azure Tables and Azure Functions. (Saved 3.5 hours daily and made monitoring more efficient).
- **Defined product requirements and expedited on-boarding for non-technical on-prem clients**.
- **Helped the company on-board 20+ clients (10X Growth) within a few months** with the help of snapshots and Terraform scripts to setup the client in a few minutes and save additional efforts.

## SKILLS

---

### Technical Skills

AWS, Docker, Kubernetes, Terraform, Jenkins, Kustomize, Github Actions

### Languages

Python, Go, Bash, Powershell

### Soft Skills

Creativity, Verbal Communication, Empathy, Active Listening

**EDUCATION**

---

<b>Class XII</b> , Bharatiya Vidya Bhawan's Mehta Vidyalaya (CBSE), Delhi, India	2014 - 2015
<b>Bachelor of Technology, Electronics and Communication</b> , IIIT Delhi, India	2015 - 2019
